Atlas of Oculoplastic and Orbital Surgery Jonathan Dutton

Unlike other books of its kind, the new Atlas of Oculoplastic and Orbital Surgery offers detailed, step-by-step instructions from initial skin marking and cut to final closure for more than 90 commonly performed oculoplastic, lacrimal, and orbital surgeries. Each step also includes a matching illustration inverted to accommodate the surgeon's actual position during the surgery.

In addition to clear instruction, the text for each surgery covers preoperative evaluation discussions, postoperative care instructions, and how to avoid and manage potential complications.
