Combined Cycle Systems for Near-Zero Emission Power Generation (Woodhead Publishing Series in Energy)

Combined Cycle Systems for Near-Zero Emission Power Generation (Woodhead Publishing Series in Energy)

Combined cycle power plants are one of the most promising ways of improving fossil-fuel and biomass energy production. The combination of a gas and steam turbine working in tandem to produce power makes this type of plant highly efficient and allows for CO₂ capture and sequestration before combustion. This book provides a comprehensive review of the design, engineering and operational issues of a range of advanced combined cycle plants.

After introductory chapters on basic combined cycle power plant and advanced gas turbine design, the book reviews the main types of combined cycle system. Chapters discuss the technology, efficiency and emissions performance of natural gas-fired combined cycle (NGCC) and integrated gasification combined cycle (IGCC) as well as novel humid air cycle, oxy-combustion turbine cycle systems. The book also reviews pressurised fluidized bed combustion (PFBC), externally fired combined cycle (EFCC), hybrid fuel cell turbine (FC/GT), combined cycle and integrated solar combined cycle (ISCC) systems. The final chapter reviews techno-economic analysis of combined cycle systems.

With its distinguished editor and international team of contributors, Combined cycle systems for near-zero emission power generation is a standard reference for both industry practitioners and academic researchers seeking to improve the efficiency and environmental impact of power plants.

- Provides a comprehensive review of the design, engineering and operational issues of a range of advanced combined cycle plants
- Introduces basic combined cycle power plant and advanced gas turbine design and reviews the main types of combined cycle systems
- Discusses the technology, efficiency and emissions performance of natural gas-fired combined cycle (NGCC) systems and integrated gasification combined cycle (IGCC) systems, as well as novel humid air cycle systems and oxy-combustion turbine cycle systems

From reader reviews:

Johanna Hernandez:

This Combined Cycle Systems for Near-Zero Emission Power Generation (Woodhead Publishing Series in Energy) book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is usually information inside this e-book incredible fresh, you will get data which is getting deeper a person read a lot of information you will get. This particular Combined Cycle Systems for Near-Zero Emission Power Generation (Woodhead Publishing Series in Energy) without we comprehend teach the one who looking at it become critical in pondering and analyzing. Don't become worry Combined Cycle Systems for Near-Zero Emission Power Generation (Woodhead Publishing Series in Energy) can bring once you are and not make your bag space or bookshelves' grow to be full because you can have it within your lovely laptop even cellphone. This Combined Cycle Systems for Near-Zero Emission Power Generation (Woodhead Publishing Series in Energy) having fine arrangement in word in addition to layout, so you will not really feel uninterested in reading.

Lisa Hegland:

Often the book Combined Cycle Systems for Near-Zero Emission Power Generation (Woodhead Publishing Series in Energy) has a lot of knowledge on it. So when you make sure to read this book you can get a lot of benefit. The book was compiled by the very famous author. This articles author makes some research just before write this book. This specific book very easy to read you can find the point easily after reading this article book.

Mary Marshall:

This Combined Cycle Systems for Near-Zero Emission Power Generation (Woodhead Publishing Series in Energy) is great book for you because the content which is full of information for you who have always deal with world and possess to make decision every minute. This specific book reveal it details accurately using great coordinate word or we can say no rambling sentences included. So if you are read this hurriedly you can have whole facts in it. Doesn't mean it only offers you straight forward sentences but challenging core information with attractive delivering sentences. Having Combined Cycle Systems for Near-Zero Emission Power Generation (Woodhead Publishing Series in Energy) in your hand like getting the world in your arm, info in it is not ridiculous just one. We can say that no book that offer you world throughout ten or fifteen small right but this book already do that. So , this really is good reading book. Hey there Mr. and Mrs. busy do you still doubt which?

Jack Rolfes:

In this era globalization it is important to someone to receive information. The information will make a professional understand the condition of the world. The health of the world makes the information better to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon.

You will see that now, a lot of publisher which print many kinds of book. The book that recommended for you is Combined Cycle Systems for Near-Zero Emission Power Generation (Woodhead Publishing Series in Energy) this e-book consist a lot of the information on the condition of this world now. This particular book was represented how does the world has grown up. The language styles that writer use to explain it is easy to understand. The writer made some investigation when he makes this book. Here is why this book ideal all of you.
