Mastering Digital Librarianship: Strategy, Networking and Discovery in Academic Libraries

Alison Mackenzie, Lindsey Martin

Mastering Digital Librarianship: Strategy, Networking and Discovery in Academic Libraries Alison Mackenzie, Lindsey Martin

This book examines the changing roles of the librarian and how working within a rich digital environment has impacted on the ability of professionals to develop the appropriate 'know how', skills, knowledge and behaviours required in order to operate effectively. Expert specialists and opinion makers from around the world discuss the challenges and successes of adapting existing practices, introducing new services and working with new partners in an environment that no longer recognises traditional boundaries and demarcation of roles. The book is structured thematically, with a focus on three key strands where the impact of digital technologies is significant: * Communication - looks at how mobile devices are being used by LIS to enhance communication between services, staff, students and other stakeholder groups and investigates the extent to which LIS have successfully incorporated social media in their approach to managing customer enquiries. * Teaching and Learning - examines the role of the librarian in engaging with, supporting and training Generation Y researchers in adapting to changing scholarly practices brought about by digitally rich research environment. * Service Innovation - investigates the impact of the digital on collection management and user choice, the design and management of learning spaces to integrate mobile technologies and the impact this has on how librarians work within the space and support users in their effective use of technologies for communication, sharing and learning. Readership: Librarians, library schools, departments of information science and other professional groups such as education developers, learning technologists and IT specialists.
