Divided We Stand: A Biography Of New York's World Trade Center Eric Darton

When the World Trade Towers in New York City were erected at the Hudson's edge, they led the way to a real estate boom that was truly astonishing. *Divided We Stand* reveals the coming together and eruption of four volatile elements: super-tall buildings, financial speculation, globalization, and terrorism. The Trade Center serves as a potent symbol of the disastrous consequences of undemocratic planning and development. This book is a history of that skyscraping ambition and the impact it had on New York and international life. It is a portrait of a building complex that lives at the convergence point of social and economic realities central not only to New York City but to all industrial cities and suburbs. A meticulously researched historical account based on primary documents, *Divided We Stand* is a contemporary indictment of the prevailing urban order in the spirit of Jane Jacobs's mid-century classic *The Death and Life of Great American Cities*.
