Multimedia Maths Bieke Masselis, Ivo De Pauw

Multimedia Maths provides an accessible guide to understanding and using basic software applications including the golden section, co-ordinate systems, collision detection, vectors and parameters.

Screen effects and image handling are explained at a complex level using a more detailed outline to build and develop on the basic transformations.

More advanced multi-media themes of quaternion rotation, fractal texture, Bézier curves and B-splines are deconstructed and usefully linked to an interactive website.
