## Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series)

The growing interest in using combination drugs to treat various complex diseases has spawned the development of many novel statistical methodologies. The theoretical development, coupled with advances in statistical computing, makes it possible to apply these emerging statistical methods in *in vitro* and *in vivo* drug combination assessments. However, despite these advances, no book has served as a single source of information for statistical methods in drug combination research, nor has there been any guidance for experimental strategies.

Statistical Methods in Drug Combination Studies fills that gap, covering all aspects of drug combination research, from designing *in vitro* drug combination studies to analyzing clinical trial data. Featuring contributions from researchers in industry, academia, and regulatory agencies, this comprehensive reference:

- Describes statistical models used to characterize dose–response patterns of monotherapies and evaluate the combination drug synergy
- Offers guidance for estimating interaction indices and constructing their associated confidence intervals to assess drug interaction
- Introduces a practical and innovative Bayesian approach to Phase I cancer trials, including actual trial examples to illustrate use
- Examines strategies in the fixed-dose combination therapy clinical development via case studies stemming from regulatory reviews
- Evaluates computational tools and software packages used to apply novel statistical methods in combination drug development

**Statistical Methods in Drug Combination Studies** provides researchers with a solid understanding of the available statistical methods and computational tools and how to apply them in drug combination studies. The book is equally useful for statisticians to become better equipped to deal with drug combination study design and analysis in their practice.

### **From reader reviews:**

#### **Suzanne Brooke:**

Why? Because this Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) is an unordinary book that the inside of the reserve waiting for you to snap the idea but latter it will distress you with the secret the idea inside. Reading this book adjacent to it was fantastic author who also write the book in such wonderful way makes the content inside of easier to understand, entertaining technique but still convey the meaning completely. So , it is good for you because of not hesitating having this any more or you going to regret it. This excellent book will give you a lot of advantages than the other book have got such as help improving your talent and your critical thinking method. So , still want to hold off having that book? If I were being you I will go to the e-book store hurriedly.

#### **Stephanie Dillard:**

The book untitled Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) contain a lot of information on this. The writer explains her idea with easy method. The language is very clear and understandable all the people, so do not necessarily worry, you can easy to read this. The book was authored by famous author. The author will take you in the new era of literary works. You can actually read this book because you can read on your smart phone, or device, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site as well as order it. Have a nice read.

#### **Donna Davis:**

This Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) is brand new way for you who has fascination to look for some information since it relief your hunger associated with. Getting deeper you onto it getting knowledge more you know or else you who still having bit of digest in reading this Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series) can be the light food in your case because the information inside that book is easy to get by anyone. These books develop itself in the form which is reachable by anyone, that's why I mean in the e-book form. People who think that in guide form make them feel sleepy even dizzy this guide is the answer. So you cannot find any in reading a reserve especially this one. You can find what you are looking for. It should be here for a person. So , don't miss the item! Just read this e-book style for your better life and also knowledge.

#### **Donna Feuerstein:**

In this era which is the greater man or who has ability to do something more are more precious than other. Do you want to become one of it? It is just simple strategy to have that. What you must do is just spending your time not much but quite enough to possess a look at some books. Among the books in the top list in your reading list will be Statistical Methods in Drug Combination Studies (Chapman & Hall/CRC Biostatistics Series). This book that is qualified as The Hungry Inclines can get you closer in turning into

precious person. By looking up and review this reserve you can get many advantages.
