Eva Jablonka, Marion J. Lamb, Anna Zeligowski

Evolution in Four Dimensions: Genetic, Epigenetic, Behavioral, and Symbolic Variation in the History of Life (Life and Mind: Philosophical Issues in Biology and Psychology) Eva Jablonka, Marion J. Lamb, Anna Zeligowski

This new edition of the widely read *Evolution in Four Dimensions* has been revised to reflect the spate of new discoveries in biology since the book was first published in 2005, offering corrections, an updated bibliography, and a substantial new chapter. Eva Jablonka and Marion Lamb's pioneering argument proposes that there is more to heredity than genes. They describe four "dimensions" in heredity -- four inheritance systems that play a role in evolution: genetic, epigenetic (or non-DNA cellular transmission of traits), behavioral, and symbolic (transmission through language and other forms of symbolic communication). These systems, they argue, can all provide variations on which natural selection can act. Jablonka and Lamb present a richer, more complex view of evolution than that offered by the gene-based Modern Synthesis, arguing that induced and acquired changes also play a role. Their lucid and accessible text is accompanied by artist-physician Anna Zeligowski's lively drawings, which humorously and effectively illustrate the authors' points. Each chapter ends with a dialogue in which the authors refine their arguments against the vigorous skepticism of the fictional "I.M." (for Ipcha Mistabra -- Aramaic for "the opposite conjecture"). The extensive new chapter, presented engagingly as a dialogue with I.M., updates the information on each of the four dimensions -- with special attention to the epigenetic, where there has been an explosion of new research. **Praise for the first edition** "With courage and verve, and in a style accessible to general readers, Jablonka and Lamb lay out some of the exciting new pathways of Darwinian evolution that have been uncovered by contemporary research." -- Evelyn Fox Keller, MIT, author of *Making Sense of Life: Explaining Biological Development with Models, Metaphors, and Machines* "In their beautifully written and impressively argued new book, Jablonka and Lamb show that the evidence from more than fifty years of molecular, behavioral and linguistic studies forces us to reevaluate our inherited understanding of evolution." -- Oren Harman, *The New Republic* "It is not only an enjoyable read, replete with ideas and facts of interest but it does the most valuable thing a book can do -- it makes you think and reexamine your premises and long-held conclusions." -- Adam Wilkins, *BioEssays*

From reader reviews:

Betty Lavery:

Book is to be different for every single grade. Book for children right up until adult are different content. As it is known to us that book is very important for all of us. The book Evolution in Four Dimensions: Genetic, Epigenetic, Behavioral, and Symbolic Variation in the History of Life (Life and Mind: Philosophical Issues in Biology and Psychology) had been making you to know about other information and of course you can take more information. It is rather advantages for you. The book Evolution in Four Dimensions: Genetic, Epigenetic, Behavioral, and Symbolic Variation in the History of Life (Life and Mind: Philosophical Issues in Biology and Psychology) is not only giving you considerably more new information but also being your friend when you really feel bored. You can spend your personal spend time to read your publication. Try to make relationship with the book Evolution in Four Dimensions: Genetic, Epigenetic, Behavioral, and Symbolic Variation in the History of Life (Life and Mind: Philosophical Issues in Biology and Psychology). You never sense lose out for everything should you read some books.

Herbert Beckley:

Often the book Evolution in Four Dimensions: Genetic, Epigenetic, Behavioral, and Symbolic Variation in the History of Life (Life and Mind: Philosophical Issues in Biology and Psychology) has a lot of knowledge on it. So when you make sure to read this book you can get a lot of benefit. The book was published by the very famous author. The writer makes some research ahead of write this book. This particular book very easy to read you can find the point easily after scanning this book.

William Johnson:

Many people spending their time by playing outside with friends, fun activity with family or just watching TV 24 hours a day. You can have new activity to enjoy your whole day by reading through a book. Ugh, you think reading a book will surely hard because you have to use the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Smartphone. Like Evolution in Four Dimensions: Genetic, Epigenetic, Behavioral, and Symbolic Variation in the History of Life (Life and Mind: Philosophical Issues in Biology and Psychology) which is getting the e-book version. So , why not try out this book? Let's notice.

Charles Brewster:

What is your hobby? Have you heard that will question when you got college students? We believe that that problem was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. And you know that little person just like reading or as examining become their hobby. You have to know that reading is very important as well as book as to be the matter. Book is important thing to increase you knowledge, except your teacher or lecturer. You will find good news or update about something by book. Many kinds of books that can you take to be your object. One of them is this Evolution in Four Dimensions:

Genetic, Epigenetic, Behavioral, and Symbolic Variation in the History of Life (Life and Mind: Philosophical Issues in Biology and Psychology).
