**Negation, Text Worlds, and Discourse (Advances in Discourse Processes)** L. Hidalgo-Downing

This work originates from the need to develop an integrated dynamic model of negation in discourse that is adequate for understanding the role of negation in an extensive and complex piece of discourse. Most work on negation is strongly influenced by traditional philosophical problems, but little work has been carried out in the area of discourse.

Approaches to negation within the functional-cognitive tradition tend to focus of specific agents of negation, its function as a speech act, or its cognitive model. Few attempts have been made to propose an integrated discourse model, studies of negation with few exceptions tend to be limited to brief selections or isolated sentences. This book fills the gap in studies of negation in discourse by providing an up-to-date critical review of the state of the art in negation and by proposing a model that brings together the semantic, cognitive, and pragmatic features of negation, which are crucial for an understanding of its role in discourse.
