RFID in Libraries: A Step Toward Interoperability (Library Technology Reports) Lori Bowen Ayre
The approval by The National Information Standards Organization (NISO) of a new standard for RFID in libraries is a big step toward interoperability among libraries and vendors. By following this set of practices and procedures, libraries can ensure that an RFID tag in one library can be used seamlessly by another, assuming both comply, even if they have different suppliers for tags, hardware, and software. In this issue of *Library Technology Reports*, Lori Bowen Ayre, an experienced implementer of automated materials handling systems,

- Provides background on the evolution of the standard
- Addresses the costs and benefits of RFID, which can be an expensive technology
- Discusses issues for libraries and their vendors in migrating to the new standards, identifying additional steps needed to remove legacy barriers
- Offers recommendations for libraries that have implemented RFID as well as for those getting started
- Shows how to use tags to optimize workflows and design new services

From reader reviews:

Bobby Hall:

Now a day those who Living in the era wherever everything reachable by talk with the internet and the resources within it can be true or not call for people to be aware of each information they get. How individuals to be smart in acquiring any information nowadays? Of course the solution is reading a book. Reading a book can help persons out of this uncertainty Information particularly this RFID in Libraries: A Step Toward Interoperability (Library Technology Reports) book since this book offers you rich data and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it you know.

Marisa Carney:

Precisely why? Because this RFID in Libraries: A Step Toward Interoperability (Library Technology Reports) is an unordinary book that the inside of the book waiting for you to snap it but latter it will surprise you with the secret the idea inside. Reading this book adjacent to it was fantastic author who have write the book in such amazing way makes the content inside easier to understand, entertaining technique but still convey the meaning thoroughly. So , it is good for you for not hesitating having this nowadays or you going to regret it. This book will give you a lot of rewards than the other book have got such as help improving your proficiency and your critical thinking technique. So , still want to hold off having that book? If I have been you I will go to the guide store hurriedly.

Donald Jones:

RFID in Libraries: A Step Toward Interoperability (Library Technology Reports) can be one of your beginning books that are good idea. All of us recommend that straight away because this reserve has good vocabulary that will increase your knowledge in language, easy to understand, bit entertaining but nevertheless delivering the information. The article author giving his/her effort to place every word into joy arrangement in writing RFID in Libraries: A Step Toward Interoperability (Library Technology Reports) however doesn't forget the main point, giving the reader the hottest and also based confirm resource details that maybe you can be among it. This great information may drawn you into completely new stage of crucial thinking.

Kimberly Hogan:

Do you like reading a guide? Confuse to looking for your chosen book? Or your book ended up being rare? Why so many question for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes examining, not only science book but novel and RFID in Libraries: A Step Toward Interoperability (Library Technology Reports) or others sources were given information for you. After you know how the fantastic a book, you feel would like to read more and more. Science book was created for teacher or maybe students especially. Those books are helping them to include their knowledge. In various other case, beside science e-book, any other book likes RFID in Libraries: A Step Toward Interoperability

(Library Technology Reports) to make your spare time a lot more colorful. Many types of book like this one.
