**Diagnostic Tests: Workshop Summary** Sarah H. Beachy, Samuel G. Johnson, Steve Olson, Adam C.

Berger, Roundtable on Translating Genomic-Based Research for Health, Board on Health Sciences Policy, Institute of Medicine

Many drug developers have examined new strategies for creating efficiencies in their development processes, including the adoption of genomics-based approaches. Genomic data can identify new drug targets for both common and rare diseases, can predict which patients are likely to respond to a specific treatment, and has the potential to significantly reduce the cost of clinical trials by reducing the number of patients that must be enrolled in order to demonstrate safety and efficacy. A key component of the approval of targeted therapeutics is the ability to identify the population of patients who will benefit from treatment, and this has largely hinged on the co-development and co-submission to the FDA of a companion diagnostic test. The co-development process, or the development of the test and drug for the simultaneous submission to FDA, has led to a major alteration in the way that drugs are being developed, with traditionally separate entities—pharmaceutical and diagnostic companies—now working in close collaboration.

*Refining Processes for the Co-Development of Genome-Based Therapeutics and Companion Diagnostic Tests* is the summary of a workshop held by the Roundtable on Translating Genomic-Based Research for Health on February 27, 2013 to examine and discuss challenges and potential solutions for the codevelopment of targeted therapeutics and companion molecular tests for the prediction of drug response. Prior to the workshop, key stakeholders, including laboratory and medical professional societies, were individually asked to provide possible solutions to resolve the concerns raised about co-development of companion diagnostic tests and therapies. Workshop speakers were charged with addressing these solutions in their presentations by providing insight on (1) whether the proposed solutions address the problems described, (2) whether there are other solutions to propose, and (3) what steps could be taken to effectively implement the proposed solutions.

**From reader reviews:**

**Donn Chavez:**

Have you spare time for any day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a wander, shopping, or went to the Mall. How about open or maybe read a book allowed Refining Processes for the Co-Development of Genome-Based Therapeutics and Companion Diagnostic Tests: Workshop Summary? Maybe it is being best activity for you. You recognize beside you can spend your time along with your favorite's book, you can better than before. Do you agree with it is opinion or you have different opinion?

**Robert Dougherty:**

Reading a reserve can be one of a lot of action that everyone in the world loves. Do you like reading book and so. There are a lot of reasons why people love it. First reading a e-book will give you a lot of new data. When you read a e-book you will get new information simply because book is one of several ways to share the information or maybe their idea. Second, studying a book will make you actually more imaginative. When you reading through a book especially fictional works book the author will bring one to imagine the story how the characters do it anything. Third, you can share your knowledge to some others. When you read this Refining Processes for the Co-Development of Genome-Based Therapeutics and Companion Diagnostic Tests: Workshop Summary, it is possible to tells your family, friends as well as soon about yours publication. Your knowledge can inspire the mediocre, make them reading a reserve.

**Cora Blanchette:**

You could spend your free time to read this book this publication. This Refining Processes for the Co-Development of Genome-Based Therapeutics and Companion Diagnostic Tests: Workshop Summary is simple to create you can read it in the recreation area, in the beach, train in addition to soon. If you did not have got much space to bring often the printed book, you can buy the particular e-book. It is make you better to read it. You can save typically the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.

**Rodney Natale:**

Don't be worry when you are afraid that this book will probably filled the space in your house, you will get it in e-book way, more simple and reachable. This particular Refining Processes for the Co-Development of Genome-Based Therapeutics and Companion Diagnostic Tests: Workshop Summary can give you a lot of buddies because by you looking at this one book you have issue that they don't and make anyone more like an interesting person. That book can be one of one step for you to get success. This guide offer you

information that possibly your friend doesn't learn, by knowing more than different make you to be great men and women. So , why hesitate? Let us have Refining Processes for the Co-Development of Genome-Based Therapeutics and Companion Diagnostic Tests: Workshop Summary.
