Mapping It Out: Expository Cartography for the Humanities and Social Sciences (Chicago Guides to Writing, Editing, and Publishing) Mark Monmonier

Writers know only too well how long it can take—and how awkward it can be—to describe spatial relationships with words alone. And while a map might not always be worth a thousand words, a good one can help writers communicate an argument or explanation clearly, succinctly, and effectively.

In his acclaimed *How to Lie with Maps*, Mark Monmonier showed how maps can distort facts. In *Mapping it Out: Expository Cartography for the Humanities and Social Sciences*, he shows authors and scholars how they can use expository cartography—the visual, two-dimensional organization of information—to heighten the impact of their books and articles.

This concise, practical book is an introduction to the fundamental principles of graphic logic and design, from the basics of scale to the complex mapping of movement or change. Monmonier helps writers and researchers decide when maps are most useful and what formats work best in a wide range of subject areas, from literary criticism to sociology. He demonstrates, for example, various techniques for representing changes and patterns; different typefaces and how they can either clarify or confuse information; and the effectiveness of less traditional map forms, such as visibility base maps, frame-rectangle symbols, and complementary scatterplot designs for conveying complex spatial relationships.

There is also a wealth of practical information on map compilation, cartobibliographies, copyright and permissions, facsimile reproduction, and the evaluation of source materials. Appendixes discuss the benefits and limitations of electronic graphics and pen-and-ink drafting, and how to work with a cartographic illustrator.

Clearly written, and filled with real-world examples, *Mapping it Out* demystifies mapmaking for anyone writing in the humanities and social sciences.

"A useful guide to a subject most people probably take too much for granted. It shows how map makers translate abstract data into eye-catching cartograms, as they are called. It combats cartographic illiteracy. It fights cartophobia. It may even teach you to find your way."—Christopher Lehmann-Haupt, *The New York Times*

From reader reviews:

Kevin Nixon:

Reading a e-book tends to be new life style on this era globalization. With examining you can get a lot of information that can give you benefit in your life. Along with book everyone in this world can share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire their particular reader with their story or their experience. Not only situation that share in the textbooks. But also they write about advantage about something that you need example. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors nowadays always try to improve their proficiency in writing, they also doing some exploration before they write to their book. One of them is this Mapping It Out: Expository Cartography for the Humanities and Social Sciences (Chicago Guides to Writing, Editing, and Publishing).

Marian Perkins:

The reason why? Because this Mapping It Out: Expository Cartography for the Humanities and Social Sciences (Chicago Guides to Writing, Editing, and Publishing) is an unordinary book that the inside of the book waiting for you to snap the item but latter it will distress you with the secret the item inside. Reading this book close to it was fantastic author who also write the book in such awesome way makes the content interior easier to understand, entertaining way but still convey the meaning completely. So , it is good for you because of not hesitating having this any more or you going to regret it. This phenomenal book will give you a lot of positive aspects than the other book possess such as help improving your ability and your critical thinking means. So , still want to delay having that book? If I ended up you I will go to the reserve store hurriedly.

Billie Brown:

Playing with family in a park, coming to see the sea world or hanging out with close friends is thing that usually you might have done when you have spare time, in that case why you don't try factor that really opposite from that. Just one activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Mapping It Out: Expository Cartography for the Humanities and Social Sciences (Chicago Guides to Writing, Editing, and Publishing), it is possible to enjoy both. It is good combination right, you still would like to miss it? What kind of hangout type is it? Oh can happen its mind hangout fellas. What? Still don't understand it, oh come on its referred to as reading friends.

Jennifer Randolph:
